

Disclaimer

The VectorVest Program ("the System") which we promote is not intended to provide you with specific or personalized advice. In all circumstances where you are looking to apply the System to your own personal needs you should consider whether you should first seek advice from a suitably qualified investment professional.

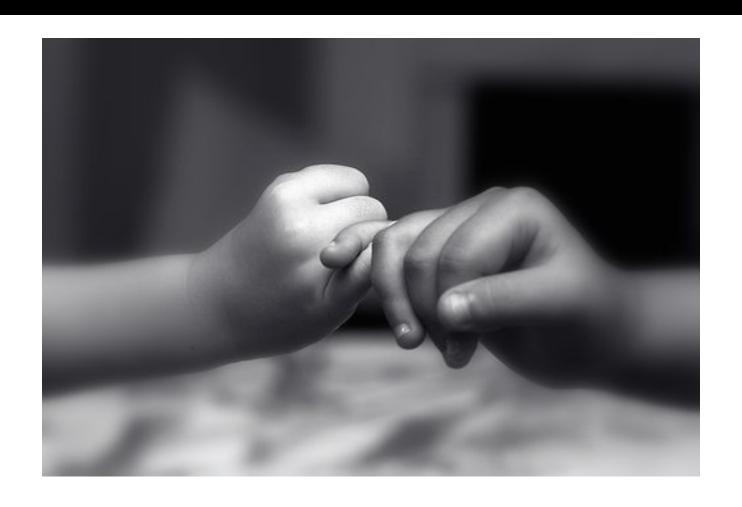

Figures and information provided refer to the past and past performance and are not a reliable indicator of future results. Where stocks are quoted in foreign currencies, returns may increase or decrease as a result of currency fluctuations. In the event that you, as a recipient of this presentation, have any doubts as to the suitability of the investments or services promoted you should seek advice from a suitably qualified investment professional.

You should be aware that the value of shares and other stocks may rise or fall. The rules on tax can change, and these changes may have an influence on the effectiveness of the System in the future. It is for you, as the tax payer, to assess the System's effectiveness throughout the process. Some assets are more readily realizable than others, and you should bear in mind that it may be difficult to deal in or obtain reliable information about their value. You should always take account of dealing charges. In addition to any initial charge quoted there may also be a bid/offer spread or dilution. Investments in options and other forms of derivatives may expose you to a higher degree of risk given market circumstances relative to other forms of quoted investments.

The System even if used in its entirety, cannot be guaranteed to provide specific returns in the short, medium or long term and you should bear in mind that individual securities may and can fluctuate considerably in value from day to day. The System has been designed without any reference to the specific interests of a particular investor. We reiterate, when using the System, you must take into account your own specific needs and liabilities.

How to Pair Technical Indicators with Market Direction

Technical analysis helps you anticipate what is likely to happen in the future.

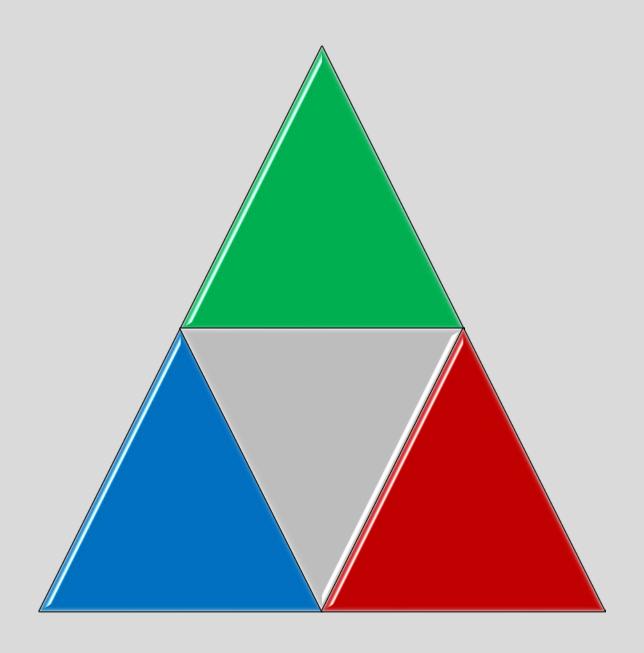

Put probability on your side

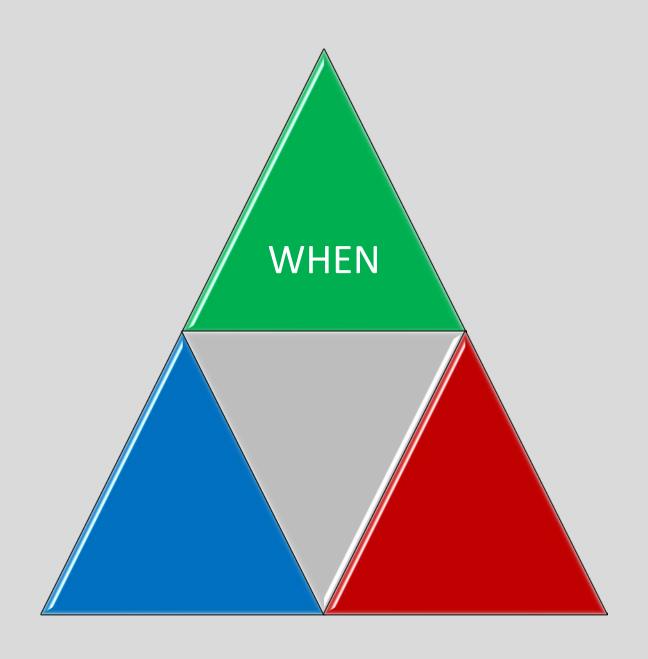

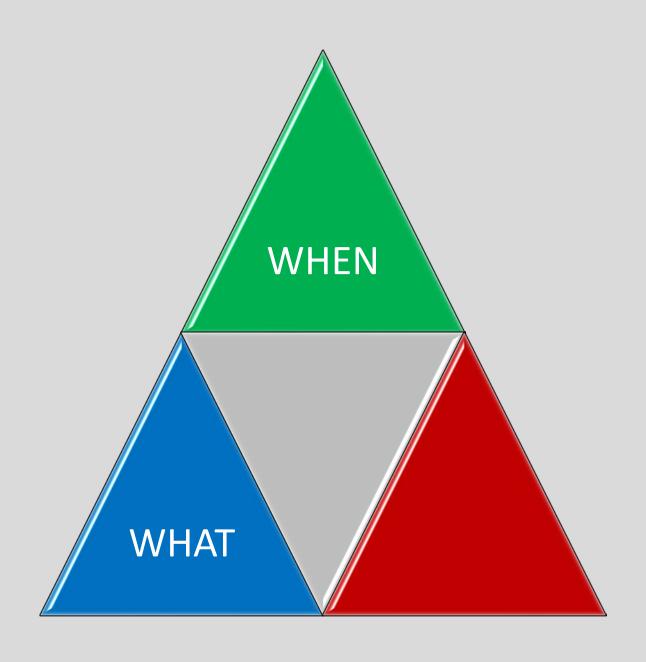

22, x 0 (50 + 5 = 10 + 30 5 H 2 600 Know what you're doing 10 4 700 400 B+ d+1 505-2 505

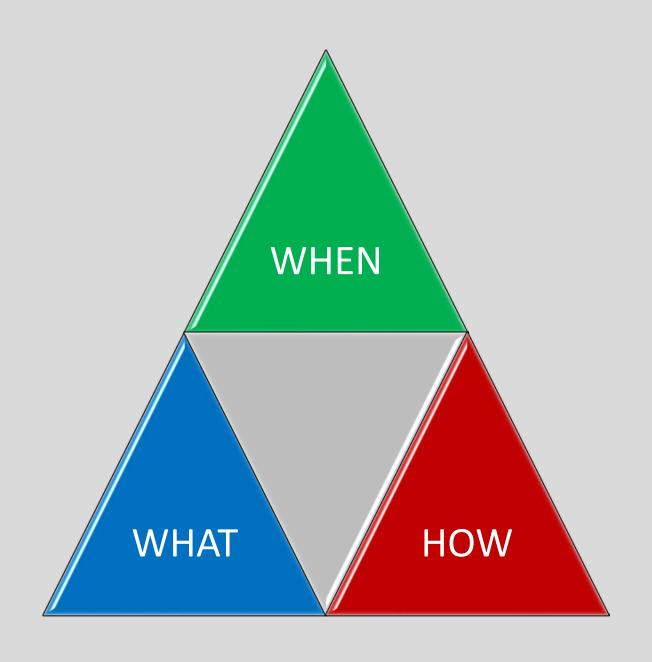

What's the most difficult part for you about finding stocks to trade?

Extremes

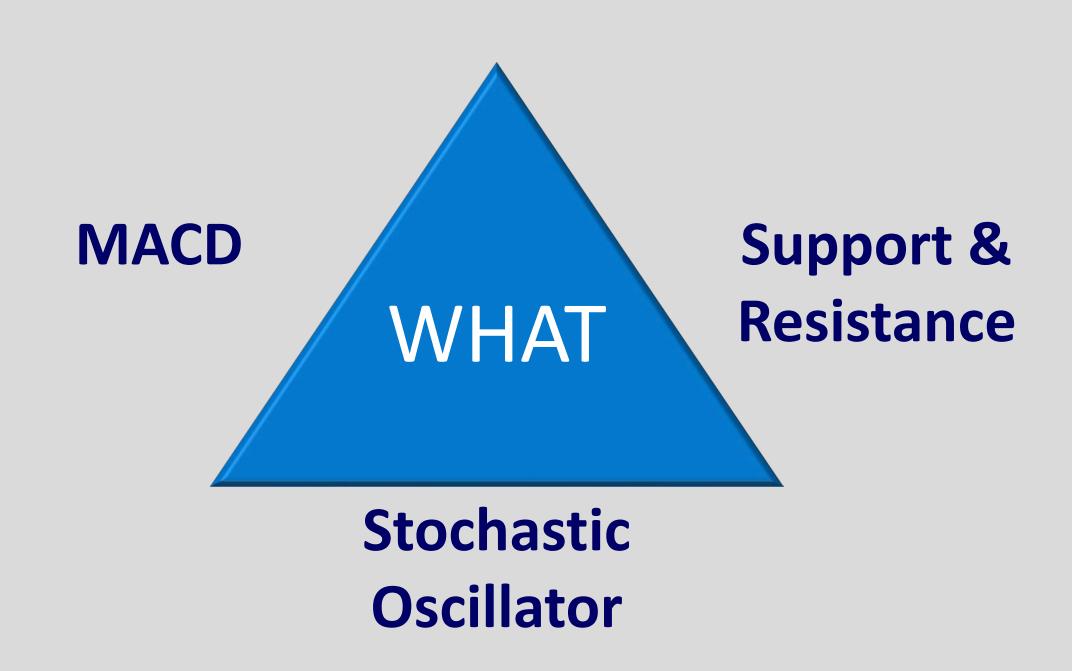

What did you learn, notice or want to share?

POLL
