Enlightened Stock Trading

The Blueprint for Trading Success: Overcoming Human Bias with Systematic Strategies

Adrian Reid

Founder
Enlightened Stock Trading

Exchange and Industry Sponsored Webinars are presented by unaffiliated third parties. Interactive Brokers LLC is not responsible for the content of these presentations. You should review the contents of each presentation and make your own judgment as to whether the content is appropriate for you. Interactive Brokers LLC does not provide recommendations or advice. This presentation is not an advertisement or solicitation for new customers. It is intended only as an educational presentation.

Disclosure:

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled Characteristics and Risks of Standardized Options by visiting ibkr.com/occ. Multiple leg strategies, including spreads, will incur multiple transaction costs.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the [CFTC Risk Disclosure](#). For a copy visit interactivebrokers.com.

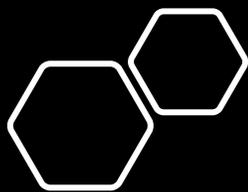

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers LLC's Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

Blueprint for Trading Success

Overcoming Human Bias with Systematic Strategies

Adrian Reid
Founder – Enlightened Stock Trading

AMS Trading & Investments Pty Ltd t/a Enlightened Stock Trading (ACN: 624 401 332) is a Corporate Authorised Representative (001301745) of Network Influencer Pty Ltd (AFSL: 282288) (trading as FZeroZero). Under these authorisations, Enlightened Stock Trading is authorised to provide general financial product advice in respect of certain classes of financial products, which include Securities and Derivatives. Any financial product advice provided is general advice only and does not take into account your personal objectives, financial situation and needs.

Risk Warning: Enlightened Stock Trading provides educational courses, this may include the supply of factual information and general advice about Securities and Derivatives. Securities and Derivatives trading involves a high level of risk and may not be suitable for all investors. You should obtain investment advice from a licensed investment adviser before making any investment decisions. Advice on physical crypto trading is conducted independently of the authorisation granted by Network Influencer Pty Ltd. Network Influencer Pty Ltd is not responsible for Enlightened Stock Trading's conduct when engaging in these activities.

Hypothetical Performance Disclosure: Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

MY GOAL:

**To show you the shortest and most
reliable path to consistent trading**

NO MATTER WHAT YOUR RESULTS UP TILL NOW

Some of the challenges traders face...

COMMON PSYCHOLOGY ISSUES

- Fear of being wiped out
- Lack of confidence in your edge / rules
- Regular execution mistakes
- Anxiety about your trades
- Over / under aggressive on risk control
- Trading takes too long
- Micromanaging individual trades
- Breaking / bending your rules
- (... and many more)

- ✘ Trading takes too much time
- ✘ Break rules at the worst possible moment
- ✘ Erratic / inconsistent results
- ✘ Large unexpected drawdowns
- ✘ Slow account growth
- ✘ Account blow-up

THE REASON:

Our Brain makes it almost impossible to succeed...

CONFIRMATION BIAS

The tendency to search for, notice and remember information in a way that confirms one's preconceptions

Ignoring data that don't align with your positions

LOSS AVERSION

The pain of losing is about twice as powerful as the pleasure of gaining

Traders hold onto losers hoping they will turn around

RECENCY BIAS

Giving more weight to recent events than older ones

Decisions not based on true probabilities

INFORMATION BIAS

Seeking information even when it does not affect action

Time expands and confusion sets in

There are dozens of biases that impact our trading decisions

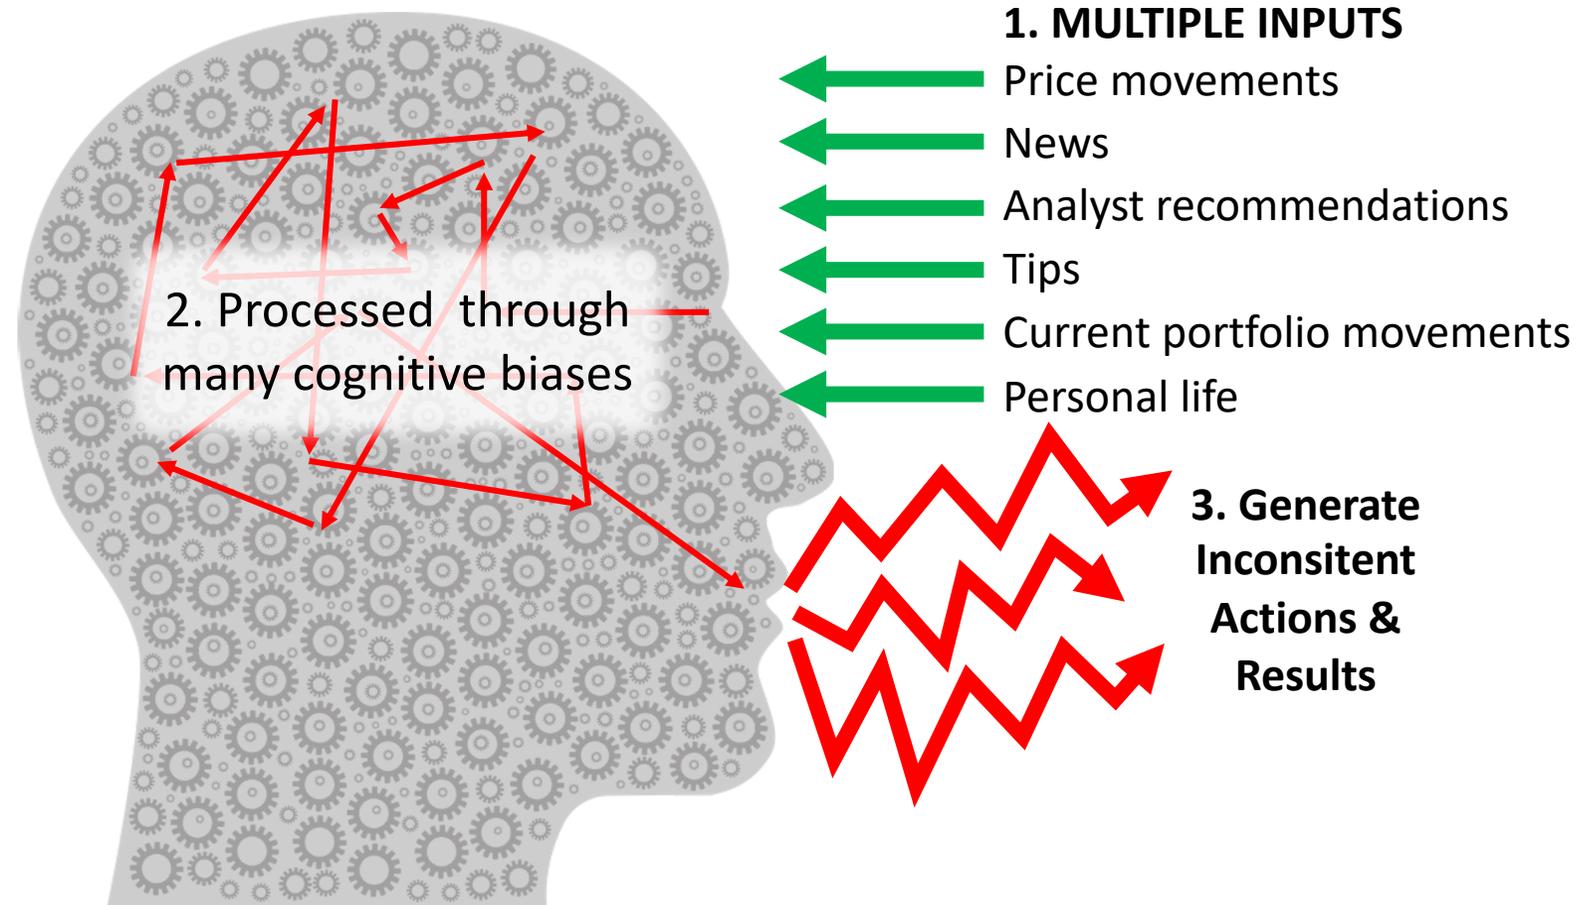

Confirmation Bias
Overconfidence Bias
Loss Aversion
Disposition Effect
Recency Bias
Anchoring Bias
Herd Mentality
Gambler's Fallacy
Availability Heuristic
Hindsight Bias
Sunk Cost Fallacy
Endowment Effect
Status Quo Bias

Action Bias
Neglect of Probability
Conservatism Bias
Self-attribution Bias
Dunning-Kruger Effect
Information Bias
Ostrich Effect
Outcome Bias
Paralysis by Analysis
Regret Aversion
Salience Bias
Selective Perception
Zero-risk Bias

Bandwagon Effect
Bias Blind Spot
Choice-supportive Bias
Hyperbolic Discounting
Normalcy Bias
Pessimism Bias
Optimism Bias
Halo Effect
Contrast Effect
Decoy Effect
Anchoring and Adjustment
Narrative Fallacy
Survivorship Bias

Authority Bias
Familiarity Bias
Ambiguity Aversion
Representativeness Heuristic
Escalation of Commitment
House Money Effect
Disposability Effect
Clustering Illusion
Commitment and Consistency Bias
Money Illusion
Framing Effect
Etc...
Etc...

These biases make trading success unlikely... because our decision making is too compromised

THE REASON:

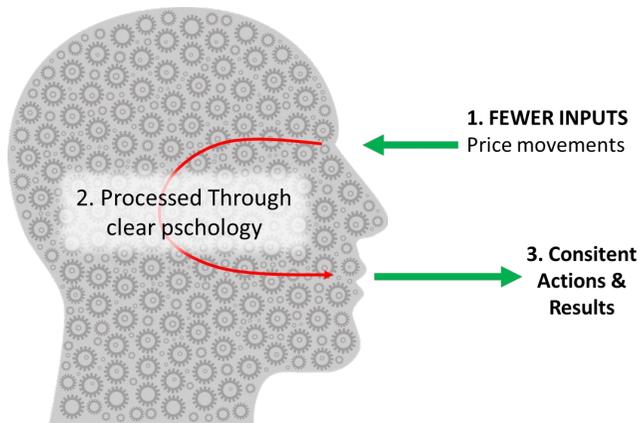

Our Brain makes it almost impossible to succeed

Confirmation Bias Action Bias Bandwagon Effect Authority Bias
Overconfidence Bias Neglect of Probability Bias Blind Spot Familiarity Bias
Loss Aversion Conservatism Bias Choice-supportive Bias Ambiguity Aversion
Disposition Effect Recency Bias Business Heuristic
Anchoring Herd Mentality Commitment Effect
Gambler's Fallacy Availability Bias Effect
Hindsight Bias Sunk Cost Fallacy Endowment Effect Consistency Bias
Status Quo Bias Saliency Bias Selective Perception Framing Effect
Zero-risk Bias Anchoring and Adjustment Narrative Fallacy Etc
Survivorship Bias Etc

HUMAN'S NATURALLY JUST
DON'T MAKE GOOD TRADERS!!!

THE SOLUTION

1. YEARS of Psychology Work

OR

2. BYPASS The Psychology Problems by SYSTEMISING your trading

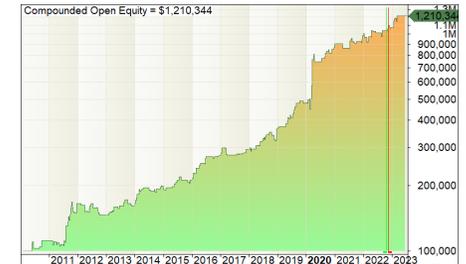

Price
Data

OBJECTIVE
RULES

If A + B + C... BUY
If D or E... SELL

CONSISTENT
RESULTS

Objective Rules = Strategy / System / Algo

The rules make the decision to buy or sell, so the psychology does not get in the way (... as much)

Example Trading System

```
//=====
//Entry Conditions (Liquidity Filters, Volatility Filters, Setup, Entry Triggers)
//=====

TrendFilter          = C > EMA(C,200);

VolatilityFilter     = ATR(14)/C>0.08;

LiquidityFilter      = MA(C*V,20)>1000000;

EntryTrigger        = Cross(5,RSI(3));

SellRule1            = C>EMA(C,3);

SellRule2            = C<EMA(C,200);

//=====
// Specify which rules to use in the Buy and Sell conditions...
//=====

Buy                  = TrendFilter
                    AND VolatilityFilter
                    AND LiquidityFilter
                    AND EntryTrigger;

Sell                 = SellRule1
                    OR SellRule2;

//=====
// Position Sizing & Risk Management
//=====

PositionScore = 100-RSI(3);

ApplyStop(stopTypeLoss,stopModePercent,40,2,False,5);
SetPositionSize(10,spsPercentOfEquity);
```

Example strategy only
Not a recommendation to trade

Backtesting

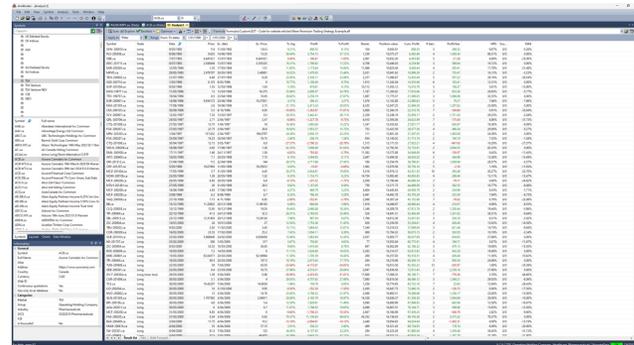

Code the rules

```
//=====
//Entry Conditions (Liquidity Filters, Volatility Filters, Setup, Entry Triggers)
//=====
TrendFilter      - C > EMA(C,200);
VolatilityFilter - ATR(14)/C<=0.08;
LiquidityFilter  - MA(C*V,20)>1000000;
EntryTrigger     - Cross(5,RSI(3));
SellRule1        - C>EMA(C,7);
SellRule2        - C<EMA(C,200);

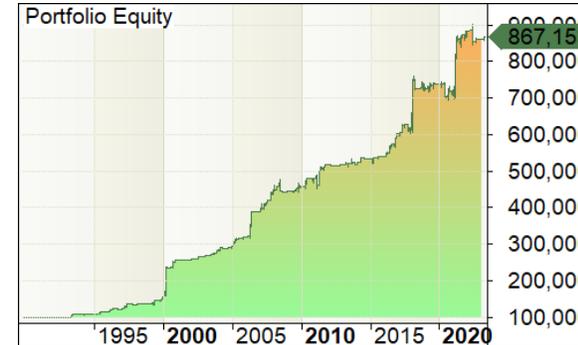

// Specify which rules to use in the Buy and Sell conditions...
//=====
Buy              - TrendFilter
                  AND VolatilityFilter
                  AND LiquidityFilter
                  AND EntryTrigger;
Sell             - SellRule1
                  OR SellRule2;

// Position Sizing & Risk Management
PositionScore = 100-RSI(3);
ApplyStop(stopTypeLoss,stopModePercent,40,1,False,5);
SetPositionSize(10,spsPercentOfEquity);
```

Benefits of Systematic Trading

- Huge amount of data about strategy performance
- Shows performance over multiple market cycles
- Improved consistency
- Absolute confidence
- Quantified edge
- Reduced time
- Improved diversification
- Bypass most psychological issues
- Allows you to evaluate whether emotional impulses are helpful... (lets do an example)

How to test emotional impulses

```

//=====
//Entry Conditions (Liquidity Filters, Volatility Filters, Setup, Entry Triggers)
//=====
TrendFilter      = C > EMA(C,200);
VolatilityFilter = ATR(14)/C>0.08;
LiquidityFilter  = MA(C*V,20)>1000000;
EntryTrigger     = Cross(5,RSI(3));
SellRule1        = C>EMA(C,3);
SellRule2        = C<EMA(C,200);

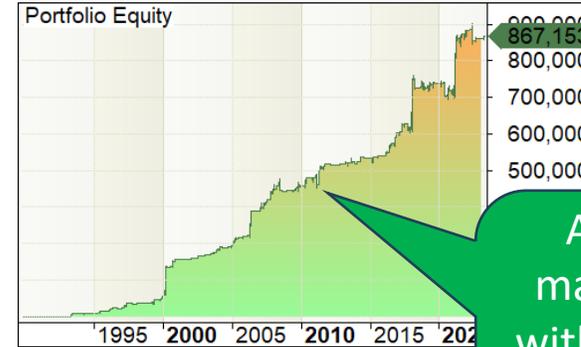

//=====
// Specify which rules to use in the Buy and Sell conditions...
//=====
Buy              = TrendFilter
                  AND VolatilityFilter
                  AND LiquidityFilter
                  AND EntryTrigger;
Sell             = SellRule1
                  OR SellRule2;

//=====
// Position Sizing & Risk Management
//=====
PositionScore = 100-RSI(3);
ApplyStop(stopTypeLoss,stopModePercent,40,2,False,5);
SetPositionSize(10,spsPercentOfEquity);
    
```

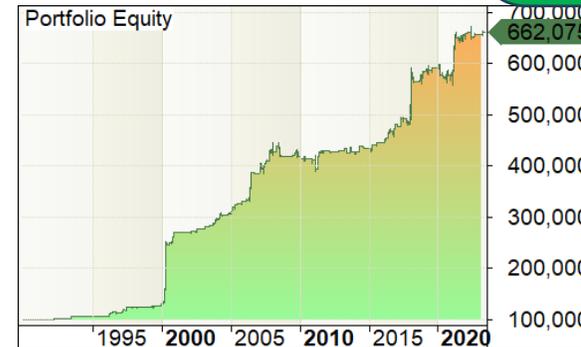

AARRGGHH... a 40% stop loss is way too wide. I don't want that much risk!!!

Test with 40% stop

Test with 5% stop

Ah... a wider stop made higher returns with lower drawdown. Ok, I'll just follow the system 😊
