Disclosure:

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled Characteristics and Risks of Standardized Options by visiting ibkr.com/occ. Multiple leg strategies, including spreads, will incur multiple transaction costs.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the <u>CFTC Risk Disclosure</u>. For a copy visit your local Interactive Brokers Website.

Security futures involve a high degree of risk and are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading security futures, please read the <u>Security Futures Risk Disclosure Statement</u>. For a visit copy your local Interactive Brokers Website.

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

IRS Circular 230 Notice: These statements are provided for information purposes only, are not intended to constitute tax advice which may be relied upon to avoid penalties under any federal, state, local or other tax statutes or regulations, and do not resolve any tax issues in your favor.

As with all investments, your capital is at risk

Linking Trade Data For Valuable Insights

Linking Market Trade Data For Insights, Valuation and Risk Analysis

Challenges Connecting Data

Challenges

Financial markets are awash with data from diverse sources: stock exchanges, options exchanges, SEC filings, Fed, press releases and more.

The richness of insights is often hidden within the complexity of this dispersed data landscape.

Insights Through Data Linkage

True market understanding requires the integration of various data sets, moving beyond isolated analysis.

Example: Valuing a company isn't just about its stock price; it involves linking earnings data and considering interest rates to uncover EBITDA valuations.

Options Trading Analysis

Options trading exemplifies the need for comprehensive data linkage:

Implied Volatility: Merging trade data with stock prices and financial constants (interest rates, dividends) for accurate calculations.

Hedging Identification: Linking option trades with stock movement data to detect hedging activities.

Market vs. Sector Movements: Comparing stock and sector data to discern specific vs. market-wide influences.

Option Multi-Leg Trade Analysis: Associating legs of multi-leg trades to understand overarching strategies.

Risks and Challenges of Compiling Data

The scattered nature of financial data, coupled with access restrictions, complicates direct analysis.

The task of collecting, cleaning, and correlating data points is beyond the practical reach of individual investors.

Data could be incomplete and contain errors.

You may not have all information available.

Software and Vendor Solutions

Specialized data vendors bridge the gap, offering aggregated and linked datasets ready for analysis.

Advanced analytical tools and software further simplify the task, enabling deep dives into linked data insights.

Benefit of Connecting Data

By intelligently connecting disparate data points, investors and analysts can uncover hidden insights, assess risks more accurately, and make informed decisions.

This approach democratizes access to sophisticated market insights, previously the domain of large institutions.
