#### **Disclosure:**

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled Characteristics and Risks of Standardized Options by visiting ibkr.com/occ. Multiple leg strategies, including spreads, will incur multiple transaction costs.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the <u>CFTC Risk Disclosure</u>. For a copy visit your local Interactive Brokers Website.

Security futures involve a high degree of risk and are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading security futures, please read the <u>Security Futures Risk Disclosure Statement</u>. For a visit copy your local Interactive Brokers Website.

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

IRS Circular 230 Notice: These statements are provided for information purposes only, are not intended to constitute tax advice which may be relied upon to avoid penalties under any federal, state, local or other tax statutes or regulations, and do not resolve any tax issues in your favor.

## Prosper Trading Academy Recession or Resilience? How To Trade Through Conflicting Market Signals

#### **Scott Bauer**

CEO & Options Trading Coach Prosper Trading Academy IBKRWEBINARS.COM

#### DISCLAIMER IMPORTANT NOTICE

The risk of trading stock options can be substantial and is not suitable for all investors. In addition to using leverage, options that are purchased decline in value over time and, if all things are equal, can expire worthless. Writing or selling options has potentially unlimited risk and can result in unlimited losses. Prosper Trading Academy only provides educational services. By accessing any Prosper Trading Academy content, you agree to be bound by the Terms of Service, which can be found at:

https://www.prospertrading.com/terms-of-service/

Any hypothetical signal results shown represent signals offered in real time in the training room. A signal does not get posted unless there is a reasonable likelihood that if an order had been placed it would have been executed. Further, adjustments are made to simulate the costs of commissions. Past performance is not necessarily indicative of future results. The posted information is shown for educational purposes only and no signal shown was actually executed as a trade.

Hypothetical or simulated performance results have certain inherent limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have under – or over – compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those talked about in our site.

#### You NEED To Manage Risk

### Scott Bauer's Tips For Managing Risk in Volatile Markets

- Position sizing matters more than direction.
- Use of stop-losses (hard vs. mental).
- Risk-defined spreads preferred.
- Delta/gamma neutral setups help in fast markets.
- Understanding vega helps in high IV regimes.
- Avoid overleveraging, trading into every event, ignoring IV crush risk.
