Disclosure:

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled Characteristics and Risks of Standardized Options or by calling (312) 542-6901.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the CFTC Risk Disclosure. For a copy visit your local Interactive Brokers Website.

Security futures involve a high degree of risk and are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading security futures, please read the Security Futures Risk Disclosure Statement. For a visit copy your local Interactive Brokers Website.

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

IRS Circular 230 Notice: These statements are provided for information purposes only, are not intended to constitute tax advice which may be relied upon to avoid penalties under any federal, state, local or other tax statutes or regulations, and do not resolve any tax issues in your favor.

Interactive Brokers LLC is a member of NYSE FINRA SIPC

Interactive Brokers Canada Inc - Is a member of the Canadian Investment Regulatory Organization (CIRO) and Member - Canadian Investor Protection Fund

Interactive Brokers (U.K.) Limited is authorised and regulated by the Financial Conduct Authority. FCA Register Entry Number 208159

Multi-Asset Trading Matters

- Different markets behave differently; volatility varies by asset
- Multi-asset trading increases opportunity during slow periods
- Diversification reduces dependence on a single market
- Some strategies work better in:
  - Stocks
  - Futures
  - Crypto
  - Options
  - Forex
- Understanding multiple assets increases trader adaptability

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

** Copyright © 2025 traddictiv PTE.LTD All rights reserved. ** The names traddictiv, tradewithufos, AutoUFOs, AutoClimate, 拓迪福, 交易外星人 and their corresponding associated logos and imageries are trademarks and/or copyrighted material of traddictiv PTE.LTD Singapore. All rights reserved.

Trading Instruments

2 key groups:

- Prime Instruments:
  Classical assets that may or may not be used for speculation purposes which vary their value based on the amount of buyers and sellers for such products

- Derivative Instruments:
  Financial contracts that are linked to a specific underlying asset from which they derive most of their price even though other external factors may also play a role in defining their total value

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

** Copyright © 2025 traddictiv PTE.LTD All rights reserved. ** The names traddictiv, tradewithufos, AutoUFOs, AutoClimate, 拓迪福, 交易外星人 and their corresponding associated logos and imageries are trademarks and/or copyrighted material of traddictiv PTE.LTD Singapore. All rights reserved.

Prime Assets: Key Characteristics

- Provide direct ownership or direct market exposure
- Typically offer lower leverage
- More stable and easier to understand for most traders
- Ideal for:
  - Long-term investing
  - Swing trading
  - Dividend or yield strategies
- Often lower regulatory complexity
- Price behavior reflects actual supply and demand

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Derivatives: Key Characteristics

- Leverage multiplies exposure
- Commonly used for:
  - Hedging
  - Income strategies
  - Short-term speculation / HFT
- Require deeper understanding of:
  - Margin / Volatility
  - Time decay (options) / Contract expiration cycles (futures)
- More sensitive to:
  - Liquidity conditions
  - Volatility spikes
  - Market structure shifts

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Stock Shares

*A stock (also known as "shares" or "equity") is a type of security that signifies proportionate ownership in the issuing corporation. This entitles the stockholder to that proportion of the corporation's assets and earnings.

Prime Instruments	Derivative Instruments
• Common Stock • Preferred Stock • ^ETFs	• Stock CFDs • Single-Stock Futures • Stock Options

^ETFs (Exchange Traded Funds) can be seen as a special form of Stock given the fact that ETFs are often made of Stocks and that the same type of trading executions can be applied to both…

Currencies

*Currency is a medium of exchange for goods and services. In short, it's money, in the form of paper or coins, usually issued by a government and generally accepted at its face value as a method of payment.

Prime Instruments	Derivative Instruments
• Cash • Spot Forex • Forwards • Cryptocurrencies	• FX CFDs • FX Futures • FX Options

Futures

*Futures are derivative financial contracts that obligate the parties to transact an asset at a predetermined future date and price. Here, the buyer must purchase or the seller must sell the underlying asset at the set price, regardless of the current market price at the expiration date.

Underlying Assets
• Individual Stocks • Equity Indices • Currencies (FX/Crypto) • Interest Rates • Commodities

*https://www.investopedia.com/terms/f/futures.asp

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Options

- Options are a tradable instrument
- Options can be used for all types of trading:
  - From long-term to intraday (swing is most common)
  - For directional and non-directional opportunities
  - For hedging purposes and more…
- Options prices are related to the value of linked-assets from which their prices are derived
- Options are known as a derivative instrument as their prices derive form such linked-assets (stocks, indices, ETFs, futures, etc.)

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Options Give Rights

Options are like holding a ticket to buy or sell something later, but with the option to back out.

Imagine you're at a pizza place, and you pay a small fee to reserve the right to buy a pizza next week at today's price. If the price of pizza goes up next week, you can use your ticket to get the pizza at the cheaper price, and you've got a good deal! But if the price stays the same or drops, you can skip the pizza and all you lose is that small reservation fee. It's like giving yourself a "maybe I will, maybe I won't" choice on a future deal!

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

** Copyright © 2025 traddictiv PTE.LTD All rights reserved. ** The names traddictiv, tradewithufos, AutoUFOs, AutoClimate, 拓迪福, 交易外星人 and their corresponding associated logos and imageries are trademarks and/or copyrighted material of traddictiv PTE.LTD Singapore. All rights reserved.

Options Provide Choices

Apart from exploiting the right to buy (Calls), we could also exploit the right to sell (Puts). Combining Options Contracts (Spreads) is a very common and a very efficient was on how to adapt to market conditions.

It's like going to the pizza place and buying tickets to both buy and sell pizzas, just in case prices go crazy. This way, no matter what happens, you have a strategy to either enjoy a great deal, protect yourself from losses, or even make a profit from the swings in pizza prices!

These combinations can get pretty creative, kind of like ordering a half-and-half pizza with extra toppings—each combination is designed to suit different tastes and protect against different price changes.

Optionable Assets

- **Stocks**
  Most common asset class for options trading.
  Examples: AAPL, TSLA, AMZN.
- **ETFs (Exchange-Traded Funds)**
  Options are available on popular ETFs that track indices, sectors, or commodities.
  Examples: SPY (S&P 500), QQQ (Nasdaq), GLD (Gold).
- **Indices**
  Options on market indices such as S&P 500, Nasdaq, or Russell 2000.
  Examples: SPX, NDX.
- **Commodities**
  Physical assets like oil, gold, and agricultural products have options contracts.
  Examples: CL (Crude Oil), GC (Gold Futures).
- **Currencies**
  Options are available on major currencies.
  Examples: EUR/USD options, USD/JPY options.
- **Futures**
  Options on futures contracts, typically for commodities and indices.
  Examples: Options on S&P 500 futures.

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Calls & Puts

- There are 2 types of options:
  - Call Options aka **Calls**
  - Put Options aka **Puts**
- **Call Options**
  - Pick up the phone call 📈📞
  - Calls gain value as stocks are headed up
- **Put Options**
  - Put the phone down 📉☎
  - Puts gain value as stocks are headed down

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Choosing the Right Market

Scalping:

- Futures, Forex, Liquid ETFs (tight spreads and deep liquidity)

Swing Trading:

- Stocks, ETFs, Crypto, Futures
- Options for leveraged swing exposure

Position Trading / Investing:

- Stocks, ETFs, Physical commodities
- Options for covered or protection-based strategies

Hedging:

- Options (protective puts, covered calls)
- Futures (broad portfolio hedges)

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

When to Use Each?

Use Prime Assets When:

- You want direct exposure to the market
- You prefer simple, transparent products
- Your time horizon is longer
- You want to avoid complex trade mechanics

Use Derivatives When:

- You need leverage or capital efficiency
- You want to hedge or generate income
- You require flexible bullish/bearish/neutral strategies
- You want market exposure without owning the underlying

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Multi-Asset Portfolios

- Watch Correlation Exposure
  - Stocks, ETFs, and index futures may overlap risk
  - Crypto may move independently
  - Commodities can hedge equity exposure
- Monitor Margin and Leverage
  - Futures margin differs from options margin and stock margin
  - Know initial vs. maintenance requirements
- Keep Position Sizing Consistent
  - Avoiding overexposure is critical across all markets
  - Volatility helps determine safe exposure levels

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

Practical Tips

- Introduce one new asset class at a time to avoid overload
- Apply the same analytical rules across all markets
- Stay aware of:
  - Contract specifications for futures
  - Greek sensitivity for options
  - Volatility clusters in crypto and forex
- Measure correlation before adding multiple positions
- Avoid using maximum leverage across different assets
- Maintain a unified risk model (e.g., volatility or ATR based)

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

** Copyright © 2025 traddictiv PTE.LTD All rights reserved. ** The names traddictiv, tradewithufos, AutoUFOs, AutoClimate, 拓迪福, 交易外星人 and their corresponding associated logos and imageries are trademarks and/or copyrighted material of traddictiv PTE.LTD Singapore. All rights reserved.

Live Demonstration

- Analyze stocks, futures, forex, and crypto using a consistent workflow
- Use AutoClimate™ to confirm trend and climate
- Use AutoUFOs® to identify institutional buy and sell UFO zones
- Compare:
  – Stock vs. option opportunities
  – Commodity vs. futures setups
- Identify when a trade idea works best on:
  – The prime asset
  – The derivative
  – Or both

Any trading symbols, entities or investment products displayed are for illustrative purposes only and are not intended to portray recommendations.

** Copyright © 2025 traddictiv PTE.LTD All rights reserved. ** The names traddictiv, tradewithufos, AutoUFOs, AutoClimate, 拓迪福, 交易外星人 and their corresponding associated logos and imageries are trademarks and/or copyrighted material of traddictiv PTE.LTD Singapore. All rights reserved.

Key Takeaways

- Prime assets offer direct exposure and are simpler
- Derivatives provide flexibility and leverage
- The same technical analysis works across all asset classes
- AutoClimate™ provides direction and climate consistency
- AutoUFOs® identifies precise entry and exit zones across markets
- Multi-asset trading increases:
  - Opportunity
  - Adaptability
  - Risk diversification
