

Forex Commissions

(all order types, exchange and regulatory fees included)

IB offers two types of forex, IDEAL Pro for forex traders of over \$25,000 USD or equivalent, and IDEAL for currency conversions under \$25,000. Unlike some other brokers that build their commissions into the spread, IB provides for transparent pricing by splitting dealer spreads from commissions.

Commissions for Forex exchanges will be charged in the trading currency (denomination of the currency being paid to purchase a currency, or being received when selling a currency).
