

## Securities Account Protection

Customer securities accounts at Interactive Brokers are protected up to \$30 million (including up to \$1 million for cash). The market value of your stocks, options, warrants, debt, and cash -- denominated in all currencies -- is covered by this insurance. Futures, options on futures, and single stock futures are not covered, but available cash will be swept from your futures account to your securities account periodically to take advantage of insurance coverage as much as possible. As with all securities firms, this insurance provides protection against failure of a broker-dealer, not against loss of market value of securities.

This protection is provided by the Securities Investor Protection Corporation (SIPC) and Lloyd's of London insurers. SIPC provides the first \$500,000 per customer (including up to \$100,000 for cash). For customers who have received the full SIPC protection, the Lloyd's policy provides up to an additional \$29.5 million (including \$900,000 for cash), subject to an aggregate limit of \$150 million.

For the purpose of determining a customer account, accounts with like names and titles (e.g. Individual/John Smith and Individual/John Smith) are combined, but accounts with different titles are not (e.g. Individual/John Smith and IRA/John Smith).

SIPC is a non-profit, membership corporation funded by broker-dealers that are members of SIPC. For more information about SIPC and answers to frequently asked questions (such as how SIPC works, what is protected, how to file a claim, etc.), please refer to the following websites:
